

Aunetic LEM

Legal Entity Management

The foundation of all entities and entity-related data - keeping your business organized, efficient, and collaborative!

Our Legal Entity Management Solution manages hundreds of thousands of legal entities and enables you to easily keep track of your legal ownership data, structure, share capital, and historical data for directors and officers.

If you can handle complex cases, you can handle anything!

- » We have the foundation to manage 1,500 entities as easily as just a few
- » Start small and let the system grow with you
- » Combine legal structure dates with directors and officers

Data Collection

- » Create a data collecting infrastructure
- » Collect, associate and store documentation
- » Combine existing data points into a common system

Focus on the important aspects

- » Once the data is collected, updates can be made with minimal effort
- » Let the system transform all data points as necessary
- » Provides a basis for further automation, enhanced visibility and control

Centralized Management

You have all the information about your legal entities in one place. This simplifies management and significantly improves transparency.

Security and Data Protection

Most important is the security of your data. Our platform uses state-of-the-art encryption technologies to protect your sensitive information.

Increased Efficiency

By automating manual processes and integrating all relevant data into a single platform, you reduce administrative burden and minimizes errors

Easy Integration

Our LEM solution integrates seamlessly into your existing systems and processes. Our API-friendly platform ensures that your IT landscape remains undisturbed, and you immediately benefit from the advantages.
